

Apports en criée de Saint Jean de Luz III - Analyse interannuelle par espèce

Evolution 1994 - 2023

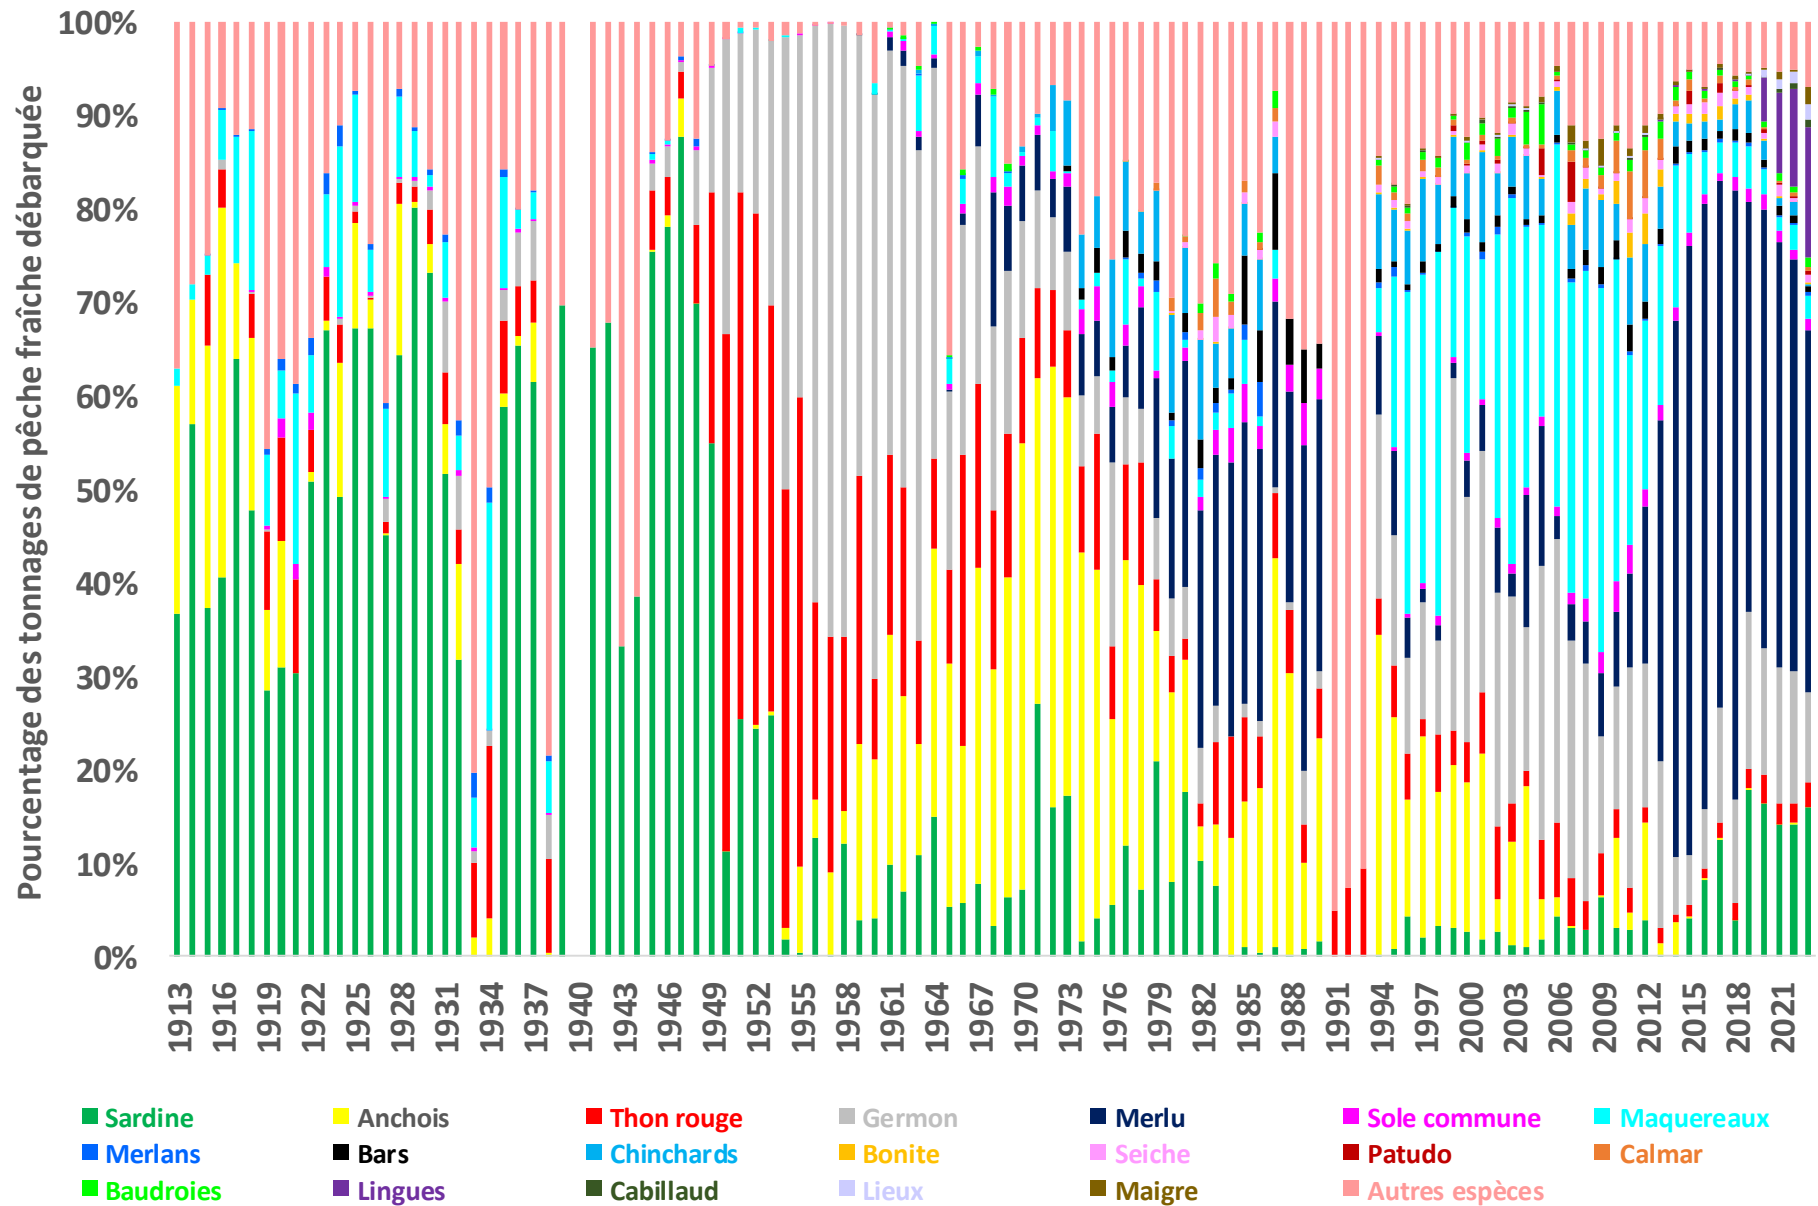

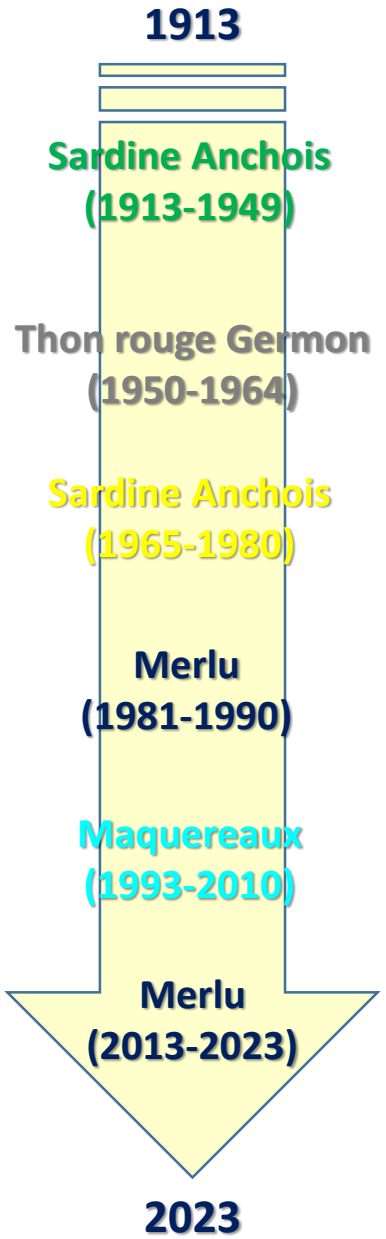

- **Avant 1945**
 - **Statistiques des pêches maritimes françaises**, rapport annuel rédigé par le Ministère de la Marine
- **Période 1945 -1994**
 - **Monographies des pêches du quartier maritime de Bayonne**, rapport annuel rédigé par les affaires maritimes locales. Les données ne concernent que les débarquements de pêche fraîche. Ces données ont été utilisées par l'IFREMER dans le rapport suivant : Charneau D., 1987. Le secteur économique de la pêche en pays Basque français : évolution depuis 1945 de la flottille et des résultats de production. Direction des Ressources vivantes, département stratégies de développement et d'aménagement, IFREMER, 114 p + annexes <http://archimer.ifremer.fr/doc/00000/4277/>
- **Période 1994 – 2007**
 - Séries chronologiques de vente en halles à marée de la [base de données VISIONET de France Agrimer](#).
- **Depuis 2008**
 - Système interne de gestion des achats/ventes de **l'association de gestion de la criée de Saint Jean de Luz / Ciboure**.

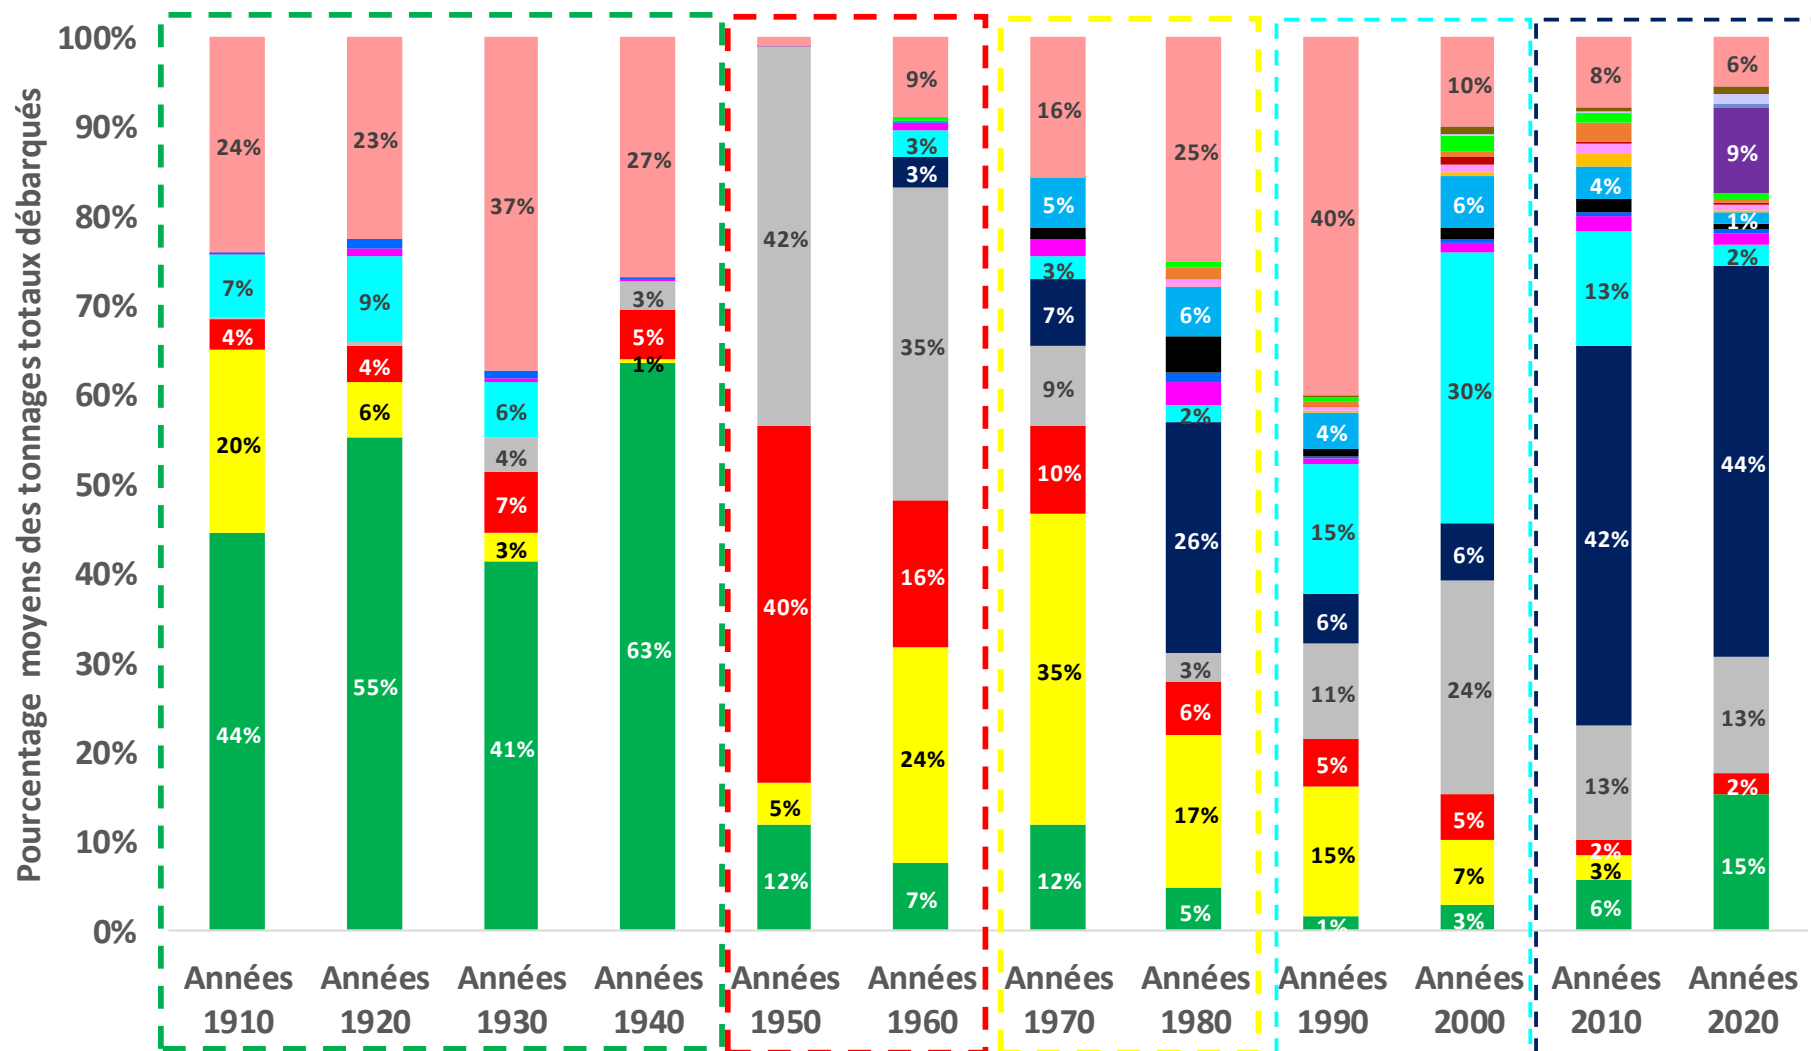

- **Débarquements**

- *Les débarquements présentés dans ce document ne concernent que les **débarquements de pêche fraîche** et ne tiennent pas compte des débarquements de pêche congelée*
- *Sur la **période 1976-1999**, les données **cumulent les débarquements de pêche fraîche des criées de Saint Jean de Luz / Ciboure et Hendaye**.*

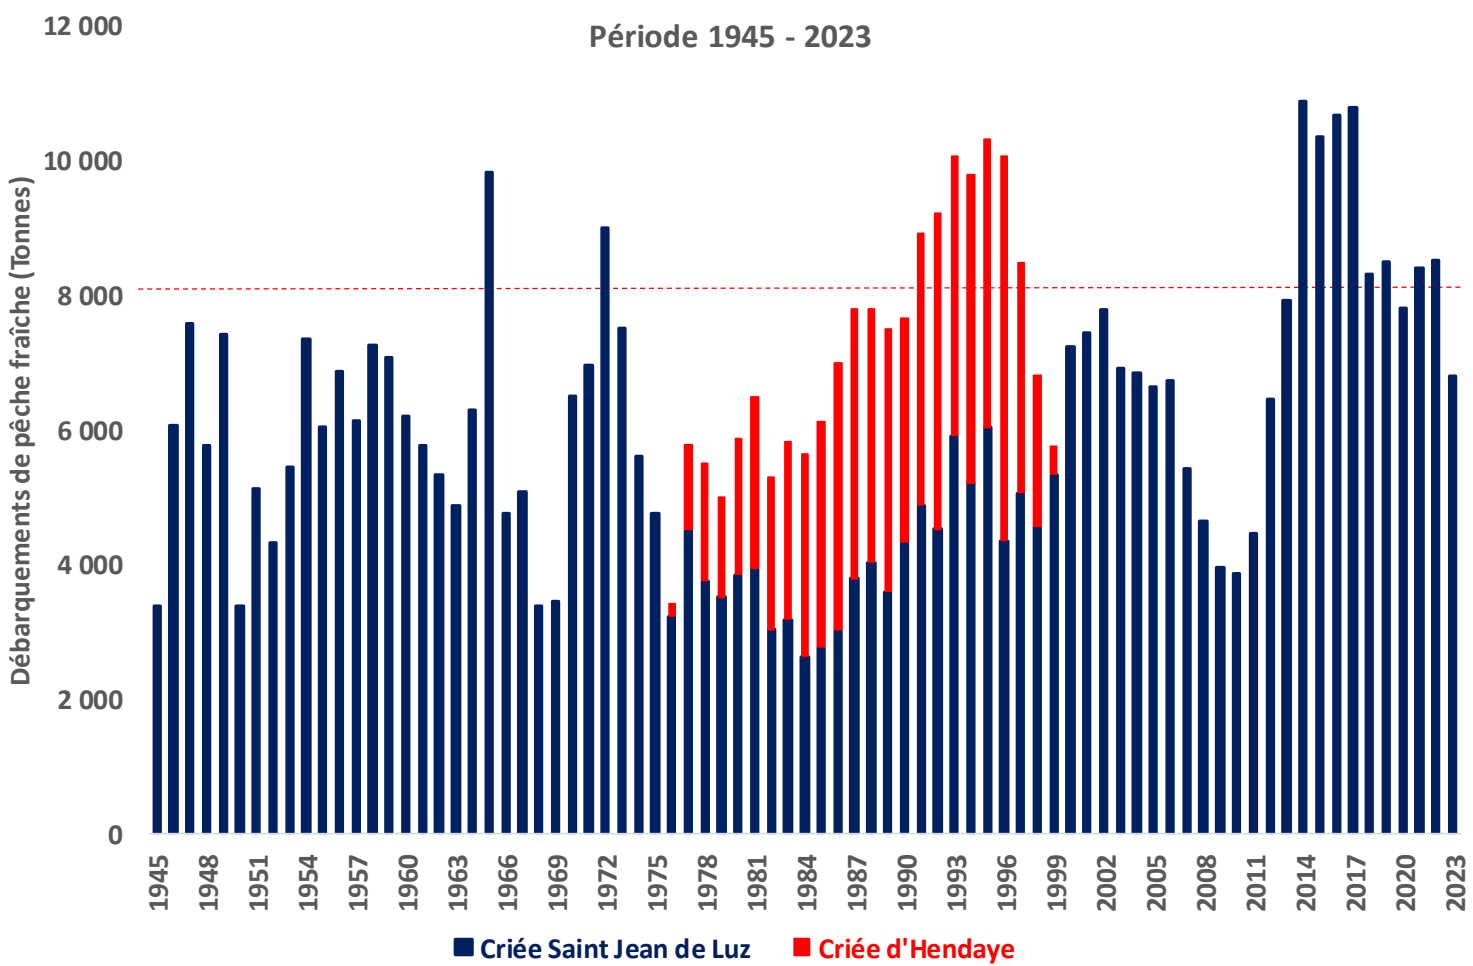

- **Valeurs et prix**

- *Les valeurs et prix moyens sont exprimés en **euros courants** de l'année en cours et en **euros constants basés sur l'année 2022**.*
- *Les euros constants sont les euros en valeur réelle c'est-à-dire corrigés de la hausse des prix par rapport à une donnée de base. Le principe du calcul des euros constants est de réaliser un calcul en retirant la hausse des prix. Lorsque le calcul n'est pas effectué en euros constants, l'évolution de la valeur de l'euro peut provenir de l'effet prix et/ou de l'effet quantité.*
- *Les prix sont des prix moyens annuels tous métiers et qualité confondues. Ils ne tiennent compte ni du métier ni de la qualité du poisson.*

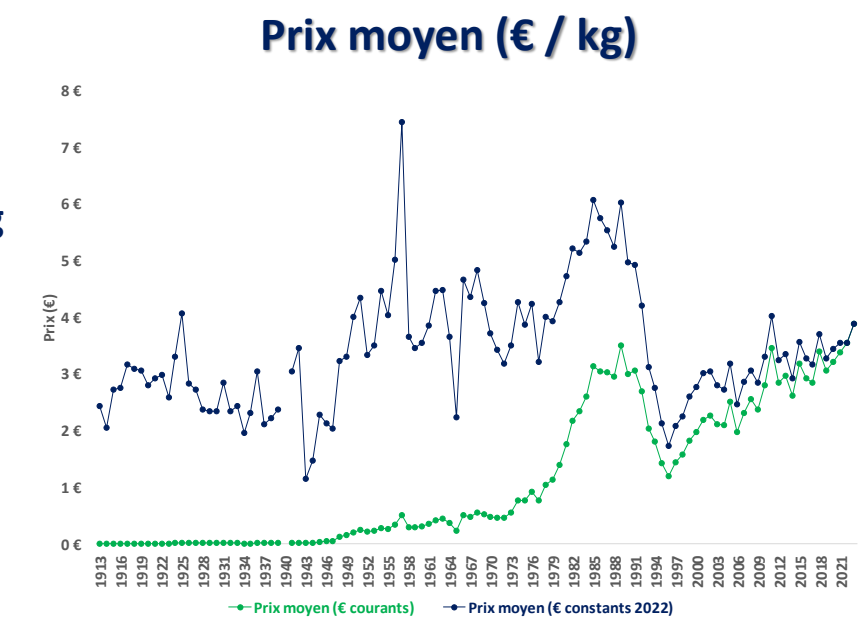

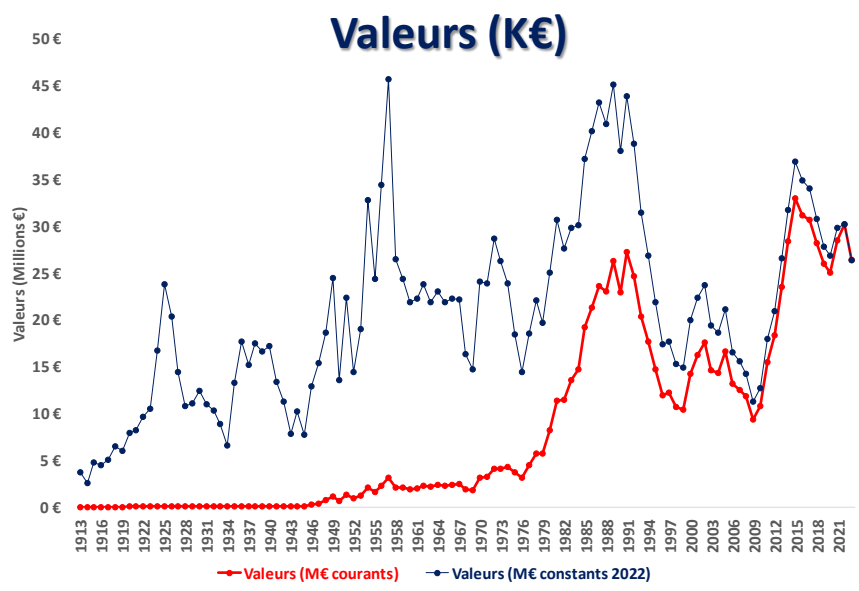

- Sardine
- Anchois
- Thon rouge
- Germon
- Merlu
- Maquereaux
- Sole commune
- Merlans
- Bars
- Chinchards
- Bonite
- Seiche
- Patudo
- Calmar

- Autres espèces

Débarquements (Tonnes)
6 801 tonnes en 2023

26,4 M€ en 2023

3,88 € / kg en 2023

🌀 135 navires producteurs

- 80 navires BA du territoire
- 13 navires BA hors du territoire
- 8 navires Adour fluvial
- 34 navires d'autres quartiers

🌀 114 entreprises d'achat

- 40 % Mareyeurs ; 32 % poissonniers ; 17 % GMS ; 4 % OP
- 32 % en Iparralde, 25 % en France (Hors nouvelle Aquitaine), 17 % en Nouvelle Aquitaine (Hors 64 et 40), 10 % en Hegoalde, 7 % en Espagne (Hors Hegoalde)

🌀 119 espèces commercialisées

🌀 6 801 tonnes débarquées (- 20 % par rapport à 2022)

🌀 26,4 Millions d'euros (- 13 % par rapport à 2022)

🌀 3,88 € / kg de moyenne (+ 9 % par rapport à 2022)

🌀 1^{ère} criée de Nouvelle Aquitaine

🌀 1^{ère} criée de France pour le débarquement de merlu

Principales tendances des débarquements entre 2022 et 2023

Lingue franche : + 231,8 tonnes (+ 40,8 %)

Maquereau commun : + 67,2 tonnes (+ 89,3 %)

Lieu noir : + 45,3 tonnes (+ 114 %)

Eglefin : + 40,9 tonnes (+ 127,4 %)

Chinchard jaune : + 39 tonnes (+ 59,3 %)

Maquereau espagnol : + 33,7 tonnes (+ 65,7 %)

Sardine : + 27,6 tonnes (+ 2,3 %)

Anchois : + 9,7 tonnes (+ 1 094,4 %)

Sébastes : + 6 tonnes (+ 224,7 %)

Ombrine bronze : + 5,9 tonnes (+ 63,4 %)

Maigre : - 58,9 tonnes (- 74,9 %)

Lingue bleue : - 55,4 tonnes (- 34,4 %)

Seiche commune : - 53,9 tonnes (- 60,5 %)

Merlu : - 52,8 tonnes (- 1,4 %)

Thon rouge : - 25 tonnes (- 13 %)

Sole commune : - 24,6 tonnes (- 22,3 %)

Germon : - 16,4 tonnes (- 1,3 %)

Baudroies : - 15 tonnes (- 22,9 %)

Bonite : - 12,7 tonnes (- 56,8 %)

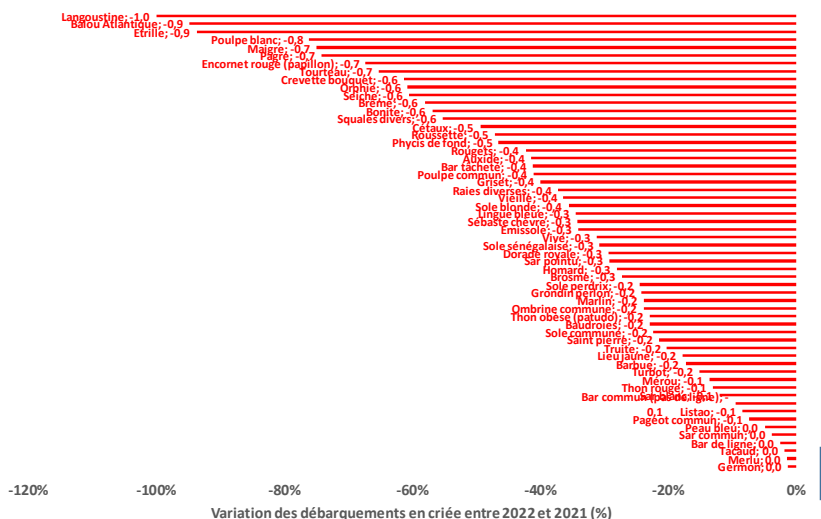

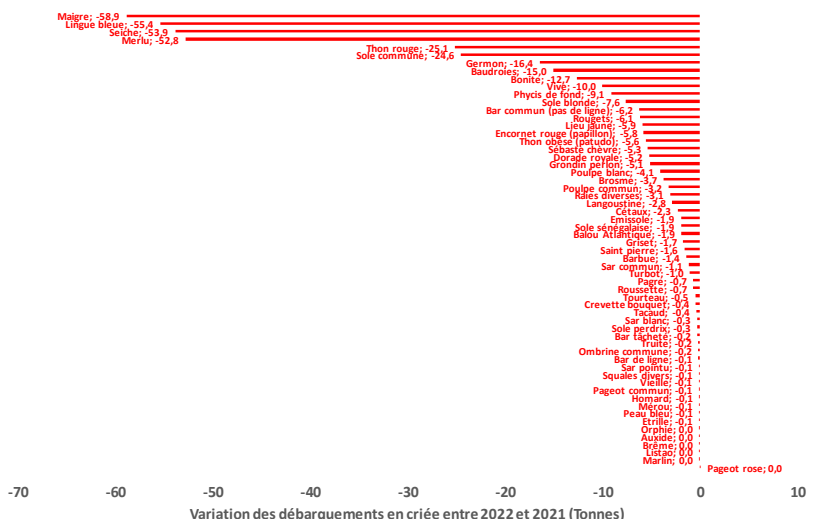

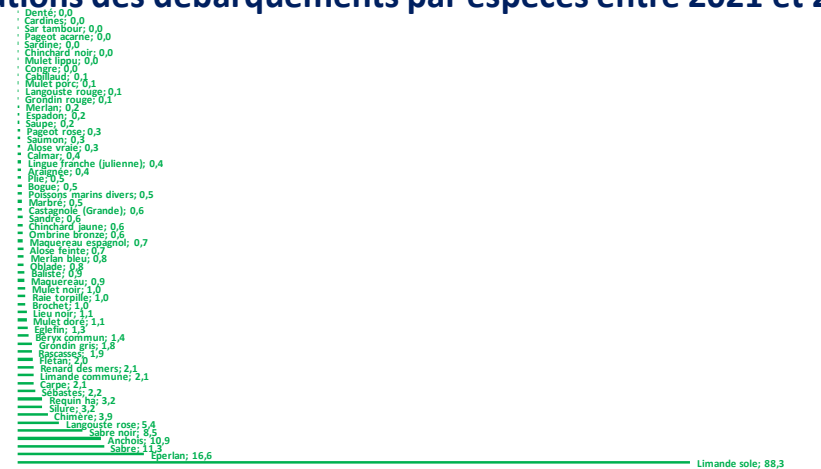

Grande vive : - 10 tonnes (- 31,2 %)

Tendances des débarquements par espèces entre 2021 et 2023

Variations des débarquements par espèces entre 2021 et 2023 (Tonnes)

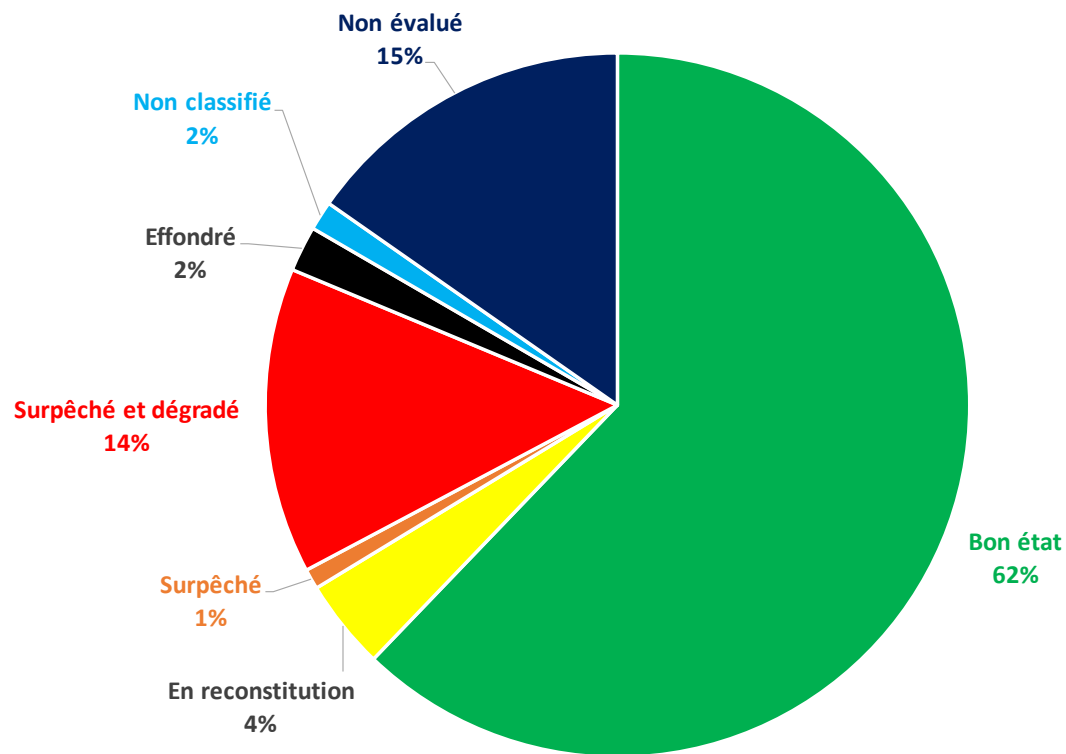

Variations des débarquements par espèces entre 2021 et 2023 (%)

Etat des stocks débarqués en criée de Saint Jean de Luz – Ciboure en 2022

Selon « [Diagnostic 2023 sur les ressources halieutiques débarquées par la pêche française hexagonale](#) », Ifremer

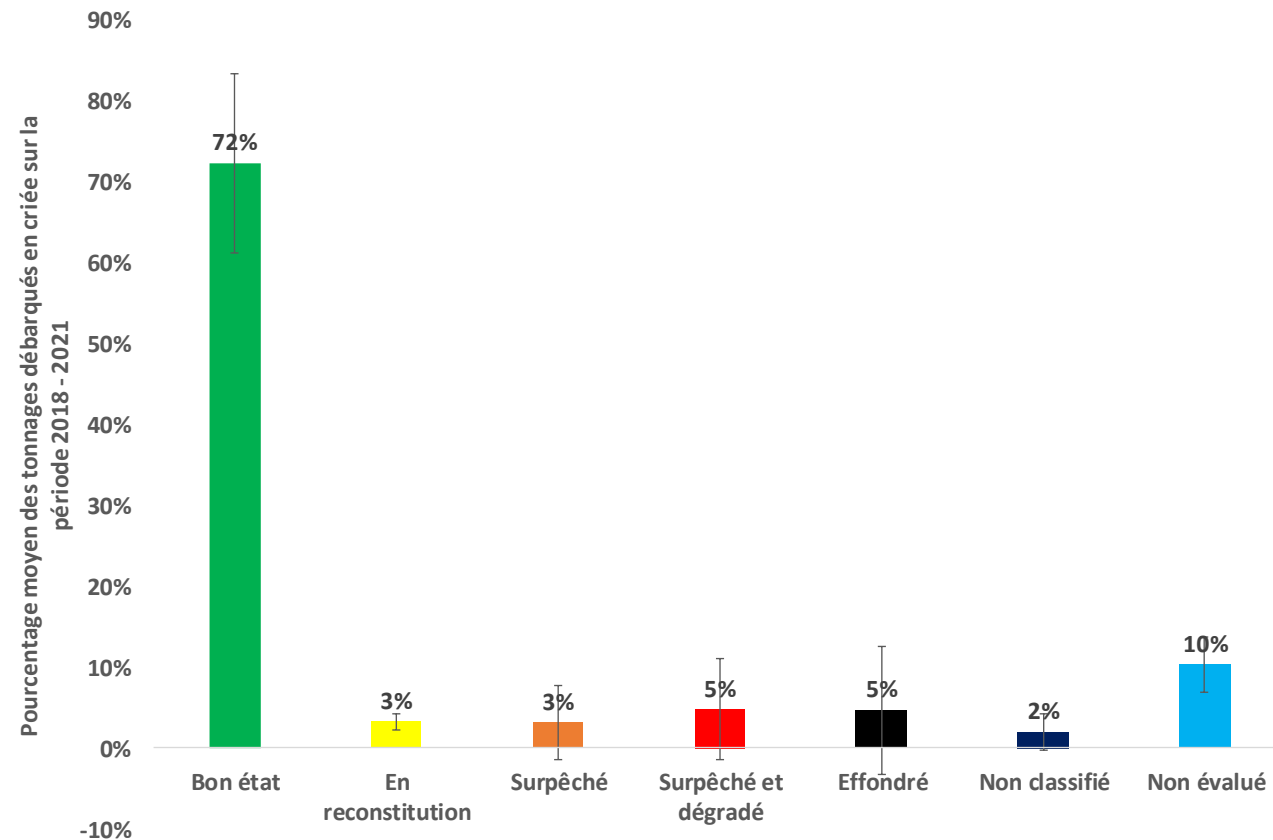

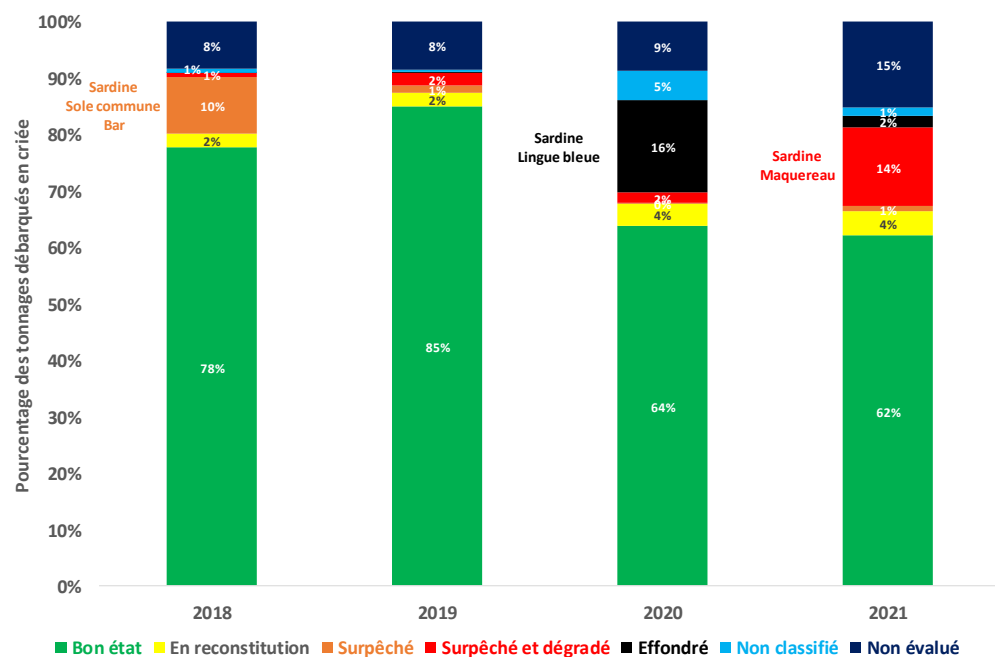

% des tonnages débarqués en criée de Saint Jean de Luz-Ciboure en 2021

66 % des tonnages débarqués en criée de Saint Jean de Luz – Ciboure sont issus de stocks en bon état ou en reconstitution

Durabilité des stocks débarqués en criée de Saint Jean de Luz – Ciboure depuis 2018

Selon « *Diagnostic 2023 sur les ressources halieutiques débarquées par la pêche française hexagonale* », Ifremer

72 +/- 11 % des tonnages débarqués en criée de Saint Jean de Luz – Ciboure sont issus de stocks en bon état
5 +/- 0,4 % sont issus de stocks en reconstitution
